- German (Basics)

PROFILE

Organised and dependable php web developer with 2 years of experience. Successful at managing multiple priorities with positive attitude. Willing to take on greater responsibilities to meet team goals.

A dedicated and passionate team player who consistently prioritizes work and delivers dependable results. Throughout my college years, I actively participated in student activities and demonstrated leadership. In my first year, I formed a group of 140 peers to solve problems on Codeforces using C, where I served as the admin. Although I missed the interview for IEEE in my second year, I successfully became a member of GDSC. In my third year, I contributed to the IEEE workshop "The Maze" and the "Portrait of Time" event, earning a certificate with my team. In my fourth year, I participated in the NTI Embedded course with C language, which lasted for three months starting from November 1, 2023. These experiences highlight my teamwork and dedication.
